## Summary

An ambitious software engineer with a strong foundation in full-stack development and data science. Proficient in Python, Java, JavaScript, HTML, CSS, React.js, and Node.js, with hands-on experience in MySQL and MongoDB. Well-versed in core computer science principles including Data Structures Algorithms, OOP, and DBMS. Demonstrates strong analytical thinking and problem-solving abilities, with a keen interest in applying technical expertise to real-world engineering and data-driven projects. Looking for opportunities to contribute effectively within a collaborative team environment.

## Extracurricular Activities

- Engaged in multiple hackathons, enhancing problem-solving speed, teamwork, and buiding practical solutions.
- Participated in multiple coding contests across platforms such as LeetCode, Geeks For Geeks ,HackerRank ,along with several local competitive events.
- Technical Lead, Student Community  
Built and led a student community to help peers develop projects. Provided guidance on coding, project structure, and implementation.

## Certification

- Ultimate Web Development - Code With Harry
- Data Scientist - Code With Harry
- Programming Fundamentals Using Python - Infosys
